PROFESSIONAL SUMMARY

Full-Stack Developer skilled in building end-to-end web applications with Python (FastAPI), Node.js, and React/Next.js. Experienced in REST API design, database management, and cloud deployments. Focused on delivering clean code and user-centered solutions.

TECHNICAL SKILLS

Backend Development: Python, FastAPI, Node.js, Express.js, RESTful APIs, Asynchronous Programming, Django (Basic)

Frontend Development: React, Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, State Management

Databases & Storage: SQL, PostgreSQL, Supabase Database, Database Modeling & Querying

DevOps & Cloud Tools: Git & GitHub, Postman, Vercel Deployment, Docker (Basic)

Data Analysis & Processing: Pandas, NumPy, Data Cleaning, Data Visualization

Core Competencies: Full-Stack Integration, API Design & Testing, Debugging & Troubleshooting, Performance Optimization

WORK & PROJECT EXPERIENCE

Full-Stack Developer | *Sapa-Shield (Student Financial Prediction System)*

- Engineered an end-to-end web application using **FastAPI (Python)** for the backend and **Next.js / React** for the user interface.
- Architected RESTful API endpoints and integrated them with frontend components to deliver real-time data insights.
- Utilized **Supabase** and SQL for database management, data persistence, and authentication.
- Designed interactive financial dashboards providing personalized survival metrics and automated recommendations.
- Configured CI/CD and production deployment using modern **Vercel** cloud workflows.

Frontend Developer | *Oasis Of Hope Worship Centre*

- Developed responsive, user-friendly web interfaces using HTML5, CSS3, and JavaScript.
- Translated UI/UX designs into production-ready code, prioritizing accessibility and cross-device compatibility.
- Integrated frontend views with backend REST APIs, optimizing load speeds and improving client usability.

Python & Data Intern | *Ingyrd Academy*

- Performed automated data extraction, cleaning, and preprocessing utilizing **Python**, **Pandas**, and **NumPy**.
- Conducted exploratory data analysis and built visual reports to communicate findings effectively.
- Engineered reusable script pipelines to increase overall data quality and integrity.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Bowen University, Iwo, Nigeria

Relevant Coursework: Programming Fundamentals, Data Structures, Database Systems, Web Development

CERTIFICATIONS & TRAINING

- Full Frontend Development Course** – Udemy
- AI with Python** – Udacity (Bertelsmann Scholarship)
- Python for Data Science** – Ingyrd Academy
- Data Analysis with Python** – Google / Coursera
- Python Programming & Data Structures** – University of Michigan / Coursera
